

GEORGE CLINKSCALES JR.

Software Engineer · (832) 441-0065 · GeorgeClinkscalesDev@proton.me · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

SUMMARY

Software engineer with production iOS apps on the App Store, a co-founded studio, and experience shipping across iOS and web. I build accessible, performant products from on-device ML to Python APIs

PROFESSIONAL EXPERIENCE

Co-Founder & Developer · [CH Studios LLC](#) · Detroit, MI · Apr 2026 – Present

- Co-founded CH Studios LLC and secured a client contract to build CommonSight, an iOS app for Detroit community organizations using SwiftUI and Apple Intelligence APIs with spatial mapping and on-device AI tooling.
- Presenting feature updates and technical progress to investors and senior stakeholders during high-stakes demo sessions.

iOS/ Android/ Web Engineer · [Tripsetta](#) · Detroit, MI · (part-time contract) Apr 2026 – Present

- Hired to maintain and ship feature updates across iOS, Android, and web platforms for an early-stage travel startup, working directly with the founder across the full product surface.

Engineer Intern · We Change Community Consulting · Detroit, MI · Feb 2026 – May 2026

- Shipped iterative features for the CommonSight iOS app in a cross-functional agile team alongside designers.

Lab Assistant · CSU Wheat Breeding Program · Fort Collins, CO · Jun 2022 – Mar 2023

PROJECTS

The Bakery Co. HTML/CSS/JS · Fuse.js · Formspree · [Website](#) May 2026

- Built a full-stack bakery ordering platform with Node.js/Express, Supabase (Postgres), and Stripe payment processing. Featuring an admin dashboard with order management, inventory, refunds, and CSV export, plus Twilio SMS, Resend email, and scheduled cron jobs, deployed to Render.

CoastCast FastAPI · CoreML · Swift Concurrency · SwiftUI · WidgetKit Mar 2026 – Present

- Shipped iOS frontend for a 54-beach conditions platform with Python FastAPI backend; built custom map clustering, weighted scoring engine, and on-device CoreML/XGBoost crowd prediction with 12 engineered features, covered by a Swift Testing suite with 120+ parameterized test cases. Added Siri Shortcuts, WidgetKit, Dynamic Island Live Activities, and a three-tier BGTaskScheduler notification system.

Detroit Sports AI Agent Python · Claude API · Agentic Tool-Use · Streamlit Apr 2026

- Built an agentic AI analyst using LLM tool-calling and few-shot prompt templates to orchestrate real-time REST API fetches and extract structured data from unstructured responses — deployed on Render with a Streamlit frontend.

TakeFlight — A Bird's Life SpriteKit · iPadOS · macOS · [App Store](#) Jan 2026 – Feb 2026

- Architected a 5-in-1 SpriteKit survival game with full keyboard support, haptic feedback, and granular audio management — shipped to App Store for iPad and macOS.

Stamped! — A City Passport Swift Concurrency · i18n · Spatial Mapping · [App Store](#) Nov 2025 – Feb 2026

- Developed an i18n travel app with live API data syncing and offline caching for reliable use in low-signal areas.

OPEN SOURCE CONTRIBUTIONS

Tandoor Recipes Open Source Contribution Django · Vue.js · Docker · Apr 2026

- Contributed to an open source meal planning app; diagnosed a feature request blocked at the library level (vue-simple-calendar lacks day-period support), documented findings on the issue to save future contributors time, and submitted a separate PR adding a missing Back button to the Ingredient Editor matching existing codebase patterns.

Handmade Network Open Source Contribution Go · HTML Templates · CSS · Apr 2026

- Submitted PR to HandmadeNetwork/hmn (#37) resolving Go-template logic errors for featured post states and auditing typography utility classes to ensure design system consistency.

Streamlit Open Source Contribution TypeScript · React · CSS-in-JS · Apr 2026

- Submitted PR to streamlit.streamlit(#14864) adding border radius rounding to st.video and st.map components for visual consistency with Streamlit's design system.

TECHNICAL SKILLS

iOS Dev: Swift, SwiftUI, UIKit, Foundation, Apple Intelligence, SwiftData, MVVM, SpriteKit, CoreML

Web & Backend: HTML/CSS/JS, Python (FastAPI/Flask), Render (Deployment), Firebase, Supabase, REST APIs

AI & ML: CoreML, XGBoost, ONNX, on-device inference, Agentic Tool-Calling, Few-Shot Prompting, Ollama, Modelfile configuration

Tools: Xcode, VSCode, Git, TestFlight, Sketch, Accessibility (VoiceOver/Dynamic Type), Claude Code, Docker, Open WebUI

EDUCATION

Engineer Participant · MSU Apple Developer Academy Detroit, MI · Sept 2025 – May 2026

B.S. Horticulture · Colorado State University Fort Collins, CO · Aug 2019 – May 2022
