

GEORGE CLINKSCALES JR.

iOS Engineer | (832) 441-0065 | gclinksc25@msu.idserve.net

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Before joining the Apple Developer Academy, I managed complex botanical data and logistical workflows in horticultural business management. I was inspired to transition into software engineering by the challenge of using technology to solve real-world logistical friction. So far, I have experience in **SwiftUI**, **CoreML**, and **Agentic AI** architectures. I add value to engineering teams by combining **scientific precision** with **test-driven development** to build accessible, HIG-compliant products that reduce operational costs through on-device intelligence.

EDUCATION

MSU Apple Developer Academy | Engineer Participant | Detroit, MI
2026

Sept 2025 - May

- **Developing** production-ready iOS apps via challenge-based learning in product strategy and entrepreneurship.

Colorado State University, Fort Collins, CO

- Bachelor of Science, Horticulture / Horticultural Business Management

Aug 2019 - May 2022

PROJECTS

Full technical documentation and demos available on [Portfolio]

The Bakery Co. | May 2026 - Current | HTML/CSS/JS, Fuse.js, Formspree

[Website](#) | [GitHub](#)

- Built a spec bakery website with live fuzzy search (Fuse.js), working form submissions via Formspree, 40+ product pages, and scroll animations using IntersectionObserver — deployed to GitHub Pages with no framework.

CoastCast | March 2026 - Current | FastAPI, CoreML, Swift Concurrency

[TestFlight](#) | [GitHub](#)

- Developed an on-device **CoreML classifier** to predict Michigan beach crowd levels.

SavingsCalculator | Apr 2026 - Apr 2026 | CoreML, WidgetKit, SwiftData, Swift Testing |

[TestFlight](#) | [GitHub](#)

- Engineered an on-device ML forecasting engine (FRED API) and WidgetKit extension for real-time rate monitoring.
- Implemented a **Swift Testing** suite covering complex financial logic and background monitoring edge cases.

Detroit Sports AI Agent | Apr 2026 - Apr 2026 | Python, Claude 3.5, Agentic Tool-Use

[Website](#) | [Github](#)

- Built an AI analyst using an **agentic architecture** to orchestrate real-time REST API fetching via LLM tool-calling and few-shot prompting.
- Designed tool-calling schema and few-shot prompt templates to reliably extract structured data from unstructured API responses.

TakeFlight — A Bird's Life | Jan 2026 - Feb 2026 | SpriteKit, iPadOS, macOS

[App Store](#)

- Architected a 4-in-1 SpriteKit survival game with interconnected mini-games and full keyboard support for iPad and macOS.
- Engineered persistent score tracking and a settings system with haptic feedback and granular audio management.

Stamped! — A City Passport | Nov 2025 - Feb 2026 | Spatial Mapping, Swift Concurrency, i18n

[App Store](#)

- Developed an i18n travel app with **live API data syncing** and offline caching for reliable use in low-signal areas.

TECHNICAL SKILLS

- **iOS Dev:** Swift, SwiftUI, UIKit, Foundation, Apple Intelligence, SwiftData, MVVM, SpriteKit, CoreML.
- **Web & Backend:** HTML/CSS/JS, Python (FastAPI/Flask), Render (Deployment), Firebase, Supabase, REST APIs.
- **Tools:** Xcode, Git, TestFlight, Prototyping (Sketch), Accessibility (VoiceOver/Dynamic Type), Claude Code, Ollama, Docker, Open WebUI, local LLM deployment, Prompt Engineering, Modelfile configuration

PROFESSIONAL EXPERIENCE

We Change Community Consulting | Engineer Intern | Detroit, MI | Feb 2026 - Apr 2026

[TestFlight](#)

- Building AI tooling for Detroit community organizations to democratize access to campaign intelligence, eliminating cloud-inference costs through on-device Apple Intelligence processing.
- Developing spatial mapping modules and led agile sprints for high stakes investor demos.

Colorado State University Wheat Breeding Program | Lab Assistant | Fort Collins, CO | Jun 2022 - Mar 2023

- **Executed** DNA/PCR marker workflows and coordinated data-driven field operations for experimental plots, managing high-precision botanical data.
